

# GreenStar

## Recognizing Excellence in Sustainability Design and Construction

---

### What is GreenStar?

GreenStar is an environmental rating system for buildings developed and administered by the Green Building Council of Australia. The rating tools award points for environmental design attributes, and awards a rating on a scale of 1 to 6 Stars. Buildings which are formally assessed and achieve 4 Stars or higher are awarded an official certified rating. Once your building has achieved a certified rating, you will be presented with a certificate and GreenStar Trademark promotional tools which can be used to promote your building.

All Ecolateral staff are experienced GreenStar Accredited Professionals who can guide your project through the GreenStar experience from initial design to final assessment. Ecolateral's unique multi-disciplinary team mentoring the design team ensures that the approach and solutions are not restricted by a single discipline perspective.

*"Synergy" at Kelvin Grove, QLD. Certified 5 Star Office Design v2 with Ecolateral as project GreenStar Professional.*

### What ratings are available?

- Office Design v3
- Office As-Built v2
- Office Interiors v1.1

### Ratings Currently Under Development by the Green Building Council of Australia

- Communities
- Performance

## What do the Rating Standards Mean?

- ★★★★ 4 Star      **Best Practice**
- ★★★★★ 5 Star      **Australian Excellence**
- ★★★★★★ 6 Star      **World Leadership**

## Computer Modeling Support Services

Preparing a GreenStar submission for formal assessment will require some computer simulation of the building. Ecolateral can undertake this modeling for you using the Integrated Environmental Solutions software package, and prepare the reports required.

## Our Experience:

- 5 Star Office Design, v2 – Synergy, Kelvin Grove, Citimark
- 6 Star Office Design, v2 – Joint Contact Centre, Zillmere, QLD Project Services
- 4 Star Industrial Pilot - Lot 12, TradeCoast Central ***Australian First***
