

Want that competitive advantage in today's tough climate?

Looking to address your environmental corporate responsibility with a low cost option?

Interested in industry recognition with award options?

GreenSmart© - Shaping the Future of Sustainable Homes!

Ecolateral are the sole independent providers of the GreenSmart© accreditation service in Queensland, South Australia and Northern Territories. Ecolateral played a key role in development of the program. It was commissioned in 1999 to write and deliver the initial program for the Housing Industry Association (HIA). This early involvement, and Ecolateral's continued input into content and delivery, provides Ecolateral with a unique insight into the application of Greensmart© for the domestic construction industry.

GreenSmart© is an industry-driven initiative that aims to encourage a mainstream application of its principles to today's housing. As a voluntary initiative, it provides appropriate market recognition for environmental endeavours in the residential construction industry.

Find out today how the Green-Smart © initiative can add value to your home and development whilst addressing your environmental corporate responsibilities.
